<p>A description of the services provided by each party, including products and services that both parties supply and any areas of geographic overlap;</p>	<p>Church View Medical Centre is a GP Practice with a list size of approximately 6300 patients based in Silksworth, Sunderland. It offers a traditional range of GP services as specified in a PMS contract as well as offering additional enhanced services supported by the South of Tyne & Wear PCT and in line with local patient requirements. Church View Medical Practice is very similar to many other GP Practices based in the locality and across the whole of Sunderland.</p> <p>City Hospitals Sunderland NHS Foundation Trust is a large District General Hospital based in Sunderland comprising approximately 1000 beds within an annual turnover approaching £250m. As well as providing all the local acute services that most District General Hospitals would provide, City Hospitals also provides some services such as Ophthalmology, Urology, Head and Neck and Renal Dialysis services on a regional or semi regional basis.</p> <p>Although the geographic service provision areas overlap with City Hospitals Sunderland being much larger than, and encompassing, Church View Medical Practice, there are no significant services that both parties supply, as in they are in different service/market sectors.</p> <p>Church View Medical Practice is located in Silksworth and there are five</p>

	<p>similar practices within a one mile radius. There are two medical practices (Dr Joshi and Colliery Medical Group) based at Silksworth Health Centre which is approximately 50 yards from Church View Medical Centre. In addition there are four further surgeries within a one mile radius and these include Dr Weaver, Springwell House, Southlands Medical Group and Peace Haven.</p> <p>There are five hospitals ranging within 7 and 17 miles of City Hospitals Sunderland with the closest being South Tyneside NHS Foundation trust and the furthest being Newcastle General Hospital which is part of the Newcastle Hospitals NHS Foundation Trust.</p> <p>Approximately 95% of all Church View's referrals to secondary care are directed through City Hospitals and this situation is not dissimilar across most of the other practices in Sunderland. The main reason that GP practices refer out of Sunderland is because the hospital does not provide the specific service required. This tends to be for specialised or tertiary specialities such as cardio thoracic surgery, radiotherapy etc.</p> <p>On this basis any patients affected by this change can easily transfer to other local GPs who all have open lists.</p>
<p>Maps setting out the location of the parties' activities as well as those of their main competitors;</p>	<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  Hosp map.doc </div> <div style="text-align: center;">  CVMP.doc </div> </div>
<p>Each merging party's turnover in England in the latest financial year, including its operating and pre-tax profits or losses;</p>	<p>Church View Medical Centre – [REDACTED] City Hospitals Sunderland NHS Foundation Trust - £5,415,000</p>
<p>The value and nature of the consideration provided for the proposed novation;</p>	<p>There is no consideration involved as this will be based around the novation of the existing PMS contract.</p>
<p>The rationale for the novation.</p>	<p>The aim of the novation is to remove organisation and contractual barriers in order to improve patient care. This will facilitate clinical integration and improve communication between primary and secondary care to help prevent avoidable admissions, facilitate discharge and help prevent re-admission in our target population within the ICO Pilot. The proposal will explore new models of working together to deliver improved outcomes due to active management of patients with long term conditions leading to more holistic care and improved quality of life for patients.</p>

	<p>We feel that the pilot will help ensure full utilisation of resources available across primary and secondary care by reduction in the use of unplanned out of hour's services A&E, Emergency Admissions and Re-admissions. Also we hope to extend patient lives and improve "the staying healthy" agenda to delay patient's transitions to frequent fliers as well as supporting dignified end of life care.</p> <p>This proposal has been selected as one of sixteen Department of Health sponsored projects to investigate the costs and benefits of integrated care. This will require continuous analysis, evaluation and reporting both on an internal and external basis with independent scrutiny from the DH, Rand and KPMG. Also as a key stakeholder the PCT will be reviewing the impact on choice and supplier induced demand in line with PRCC rule 10. The stated aim of the project is to reduce hospital admissions and if successful in the target cohort is likely to be rolled out for more segments of the practice patients.</p> <p>The aim of the pilot is to demonstrate a significant reduction in unplanned interventions for patients over the longer term.</p>
<p>Provide two copies of the most recent Annual Report and Accounts of the parties and, where relevant, copies of any agreements or other similar documents between the parties, any market studies prepared in connection with the prospective merger and any press releases or newspaper cuttings. Any other information which helps the Panel's understanding of the transaction is always welcome.</p>	<p>See as separate attachments</p>
<p>Please provide names and contact details for at least the five principal competitors and, where relevant, service commissioners for each party in each area of overlap, providing a named contact, his/her title, phone number, fax number and email address where available.</p>	<p>Alma Laing Practice Manager Colliery Medical Group Silksworth Health Centre Silksworth Sunderland SR3 2AN</p>
